DETAILED ACTION

This communication is in response to the document dated 12/15/2003.

Claims 1-6 are pending in the application. Claims 1, 3, 4, 6 are independent claims. Claims 7-31 are withdrawn from consideration based on the restriction states below. Applicant's Representative Farzad E. Amini elected group I without traverse on November 15, 2005.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-6, drawn to data structure, classified in class 707, subclass 100.
- II. Claims 7-31, drawn to online content to be delivered to customers, marketing communications, online survey, billing data processed by merchants, classified in class 707, subclass 205.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the respective inventions has a separate utility other than with the other invention. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for group I, is not required for the other group, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al. (US 6741969).

In the specification, second paragraph of the DETAILED DESCRIPTION Section, Applicants teach "The following describes some aspects of the system in the context of a commercial application where the group entity is a merchant having online presence and the member entities are the merchant's existing customers (e.g., subscribers). The description, however, is not limited to such a commercial application."

As per claims 1 and 3, Chen et al. teach:

col. 5, line 54 to col. 6, line 6; col. 13, lines 5-43 (new customer status,
dining frequency, beverage choice, and other variables.)

automatically updating the state variable of each member entity with one of
a group of predefined, first states, in response to applying one of a set of
predefined, rules to analyze some of the stored data, wherein the set of
rules are defined in part by the group entity – col. 6, lines 53-60; col. 9,
lines 25-39; col. 12, line 66 to col. 13, line 43; col. 18, lines 14-67.

each member entity based on the state variable of the member entity – col.
6, lines 7-35 and lines 57-60; col. 15, lines 43-58; col. 7, lines 1-6.

As per claim 2, Chen et al. teach:
